

FunctionLINE – Vario/Viso Aggregates

FunctionLINE Vario/Viso Aggregate

Use Vario/Viso Aggregates to cut at any angle from 0° to 100°. They can be fitted with an ER25 output, or the Combi saw output that is compatible with 45mm or 52mm bolt circles. The Viso can also accept the modular system.

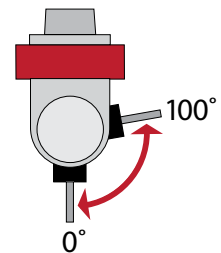

The Viso digital display aggregate takes the guesswork out of repeating angles, and makes transfer of angles from prints to aggregate easy.

Features:

- Route, drill, saw, or mortise any angle from 0° to 100°
- Viso features digital display for easy angle setting
- Output options: combination ER25 and saw blade or modular system (Viso only)

Includes:

- Collet nut & wrenches
- ER collets sold separately

Boring

Milling

Sawing

Max Speed Input (Spindle)	15,000 R.P.M.
Max Speed Output (Tool)	15,000 R.P.M.
Max Torque	14.75 ft/lbs
Gear Ratio	1:1
Lubrication	Grease
Max Temp.	85° C / 185° F
Rotation	360°
Output Direction	Opposite of machine spindle
Tool Interfaces	K1, K2 (Vario) K1, K2, Modular (Viso)
